# **Relevant Experience**

Hack for LA | August 2022 - Present

hackforla.org | vrms.io

**Software Engineer** (HTML, CSS, JavaScript, React, Node, Express, Material UI)

- Proposed and remolded the project form into a reusable component which reduced the "Edit Project" and "Add Project" code files by 50%.
- Rebuilt the VRMS navbar to match the updated Figma design while reducing the code file to 35% using Material UI.
- Improved system reliability by investigating authentication system errors.
- Authored developer documentation content for the <u>Website Wiki</u> to increase knowledge sharing and facilitate collaboration among team members.
- Enhanced user experience by performing various site maintenance and informational updates to the website.
- Conducted comprehensive code and design reviews to maintain quality standards, providing constructive feedback.

## **Projects**

Popfliix Repo | Live

- Built with React, Node, Express, MongoDB, Redux Toolkit, and Tailwind CSS.
- Fully responsive M.E.R.N with Redux Toolkit movie search web application that uses allows users to sign up, log in and manage their own personal watchlist.

The Open Book Repo | Live

- Built with JavaScript, Node, Express, MongoDB, Handlesbars, Materialize CSS and Passport.
- The Open Book is an online journal for users to share their stories. Users can create, manage and view publicly shared stories from other users.

#### **Appointment Manager System**

Repo | Live

- Built with Java, SQL, MySQL, SceneBuilder, and JavaFx.
- A GUI-based scheduling desktop application to help organizations manage appointments, clients, and reports.
